

# **FIRMAC CGF2 single ended corner inserter Data Sheet**

Image for guidance only

## **Description**

CGF2 corner inserter for easy insertion of corners. This single headed unit offers insertion at one corner of the duct to simplify the process of fitting corners by hand. Corners are loaded into a magazine and flow freely into the insertion mechanism. A duct corner will be completed in 15 seconds, which would include the time to turn the duct. The insertion process takes 5 seconds per corner. It is expected that this unit will be set level with the floor for easy loading of ducting, especially the larger ducts.

220-240Vac Single Phase. 6A, 3 Wire; Live, Neutral & Earth.
